

ENVIRONMENTAL POLICY

Sixonetwo Ltd are a leading supplier of forged and cast alloy wheels for the retail vehicle market. We acknowledge that we have a duty of care to the environment. We are committed to minimising the impact of our activities on the planet.

Some of the ways in which Sixonetwo intend to achieve this goal are:

- Commit to the protection of the environment including the prevention of pollution and the minimisation of waste.
- Ensure the responsible use of energy throughout our business, including conserving energy and improving energy efficiency where possible.
- Inform our employees about environmental issues that may affect their work.
- Promptly correct any practice or condition not in compliance with this policy.
- Ensure that all waste that is disposed of is done by a fully licensed third party - this may include used tyres, scrap metal, recyclable packaging and general waste. All waste will be disposed of and recycled correctly.
- Reduce the amount of paper where we can via the use of email.
- When packaging is used this is kept minimal. When disposed of this is done correctly and recycled wherever possible.
- Aim to reduce the amount of energy used where possible by investing in equipment with low consumption.
- Plan to implement the use of environmentally friendly products where there is an equal benefit cost.

This is the company's statement of environmental goals which outline our commitment to continual improvement of environmental management and performance.

This environmental policy is reviewed and revised by senior management as part of an annual review of our environmental performance.

Sixonetwo Ltd requires all members of staff to comply with the requirements of our environmental policy, and actively encourages the adoption of a positive approach towards the policy's implementation and its continual improvement in effectiveness.
